Downing Park, May 2015

CDBG funds allocated to the City of Newburgh will be allocated to support a partnership with the Downing Park Planning Committee and the Land Bank sponsorship from the USDA Valley Greenway funding to create a working greenhouse and gardens. The purpose is to engage our youth and the community in a partnership to educate and to appreciate the responsibilities of a community garden to promote a healthy way of living.

Our mission is to educate, empower, and encourage Newburgh residents, especially youth to participate in urban farming and healthy living.

Our goal is to build a 2 Bay green house with options for soil based farming and a hydroponic system. Environmental remediation will began on the adjacent pump house on June 1st. It is planned that this work will be completed within the week.

The set-up of the program will begin in June; raised beds will be constructed and planted. Quotes will be obtained for the Lord & Burnham greenhouse parts of which remain standing, and work will begin on the domed hydroponic system.

A program of outreach and public relations will be begun and an education program established.

In year 1, June through December 2015, it is proposed to have 1 fulltime garden director, 1 part time gardener and 1 part time education and development officer (paid on an hourly basis). An additional part-time garden assistant will be hired on an as needed basis. The program will be managed by the Land Bank under a subcontract with the City. The staff will be City of Newburgh residents, and will be placed on the payroll of the Land Bank and report to the Director of the Land Bank. The City will remit funding to the Land Bank under contract, on a quarterly basis.

In years 2 and 3 (January 2016-December 2017) the full time gardener, part time education/development officer will be retained. Two part-time gardeners will be hired on an as needed basis. CDBG will put up \$10,000 towards funds in each of Years 1-3 for garden materials. CDBG will also absorb the cost of printing and outreach. The draft budget is attached.

Terms and Conditions Sale

205 Broadway, City of Newburgh (35-2-19)

STANDARD TERMS:

1. City of Newburgh acquired title to this property in accordance with Article 11 of the Real Property Tax Law of the State of New York, and all known rights of redemption under said provisions of law have been extinguished by the tax sale proceedings and/or as a result of forfeiture.
2. For purposes of these Terms and Conditions, parcel shall be defined as a section, block and lot number.
3. All real property, including any buildings thereon, is sold "AS IS" and without any representation or warranty whatsoever as to the condition or title, and subject to: (a) any state of facts an accurate survey or personal inspection of the premises would disclose; (b) applicable zoning/land use/building regulations; (c) water and sewer assessments are the responsibility of the purchaser, whether they are received or not; (d) easements, covenants, conditions and rights-of-way of record existing at the time of the levy of the tax, the non-payment of which resulted in the tax sale in which City of Newburgh acquired title; and (e) for purposes of taxation, the purchaser shall be deemed to be the owner prior to the next applicable taxable status date after the date of sale.
4. The property is sold subject to unpaid school taxes for the tax years of 2014 and 2015 County Tax and 2014-2015 School Taxes and any subsequent levies. The purchaser shall reimburse the City for 2014 and 2015 County Taxes and 2014-2015 School Taxes and any subsequent levies. Upon the closing, the property shall become subject to taxation and apportionment of the 2015 City taxes shall be made as of the date of closing. Water and sewer charges and sanitation fees will be paid by the City to the date of closing, except that where the water meter reading nets a usage to the purchaser of less than 6 units for the quarterly bill, the purchaser shall be responsible for a minimum water and sewer bill of six units.
5. **WARNING: FAILURE TO COMPLY WITH THE TERMS OF THIS PARAGRAPH MAY RESULT IN YOUR LOSS OF THE PROPERTY AFTER PURCHASE.** The deed will contain provisions stating that the purchaser is required to rehabilitate any building on the property and bring it into compliance with all State, County and Local standards for occupancy within (18) months of the date of the deed. Within such eighteen (18) month time period the purchaser must either: obtain a Certificate of Occupancy for all buildings on the property; make all buildings granted a Certificate of Occupancy before the date of purchase fit for the use stated in such Certificate of Occupancy; or demolish such buildings. The deed shall require the purchaser to schedule an inspection by City officials at or before the end of the eighteen (18) month period. If the purchaser has not complied with the deed provisions regarding rehabilitation of the property and obtained a Certificate of Occupancy or Certificate of Compliance by that time, then the title to the property shall revert to the City of Newburgh. The deed shall also provide that the property shall not be conveyed to any other person before a Certificate of Occupancy or Certificate of Compliance is issued. A written request made to the City Manager for an extension of the eighteen (18) month rehabilitation period shall be accompanied by a non-refundable fee of \$250.00 per parcel for which a request is submitted. The City Manager may, in his sole discretion and for good cause shown, grant one extension of time to rehabilitate of up to, but not to exceed, three (3) months. Any additional request thereafter shall be made in writing and placed before the City Council for their consideration.
6. Notice is hereby given that the property lies within the East End Historic District as designated upon the zoning or tax map. This parcel is being sold subject to all provision of law applicable thereto and it is the sole responsibility of the purchaser to redevelop such parcel so designated in accordance with same.
7. All purchasers are advised to personally inspect the premises and to examine title to the premises prior to the date upon which the sale is scheduled to take place. Upon delivery of the quitclaim deed by the City of Newburgh to the successful purchaser, any and all claims with respect to title to the premises are merged in the deed and do not survive.

8. No personal property is included in the sale of any of the parcels owned by City of Newburgh, unless the former owner or occupant has abandoned same. The disposition of any personal property located on any parcel sold shall be the sole responsibility of the successful purchaser following the closing of sale.
9. The City makes no representation, express or implied, as to the condition of any property, warranty of title, or as to the suitability of any for any particular use or occupancy. Property may contain paint or other similar surface coating material containing lead. Purchaser shall be responsible for the correction of such conditions when required by applicable law. Property also may contain other environmental hazards. Purchaser shall be responsible for ascertaining and investigating such conditions prior to bidding. Purchaser shall be responsible for investigating and ascertaining from the City Building Inspector's records the legal permitted use of any property prior to closing. Purchaser acknowledges receivership of the pamphlet entitled "Protecting Your Family from Lead in Your Home." Purchaser also acknowledges that he/she has had the opportunity to conduct a risk assessment or inspection of the premises for the presence of lead-based paint, lead-based paint hazards or mold.
10. The entire purchase price and all closing costs/fees must be paid by money order or guaranteed funds to the City of Newburgh Comptroller's Office on or before August 14, 2015. *The City of Newburgh does not accept credit card payments for the purchase price and closing costs/fees.* **The City is not required to send notice of acceptance or any other notice to a purchaser.** At closing, purchaser, as grantee, may take title as a natural person or as an entity wherein purchaser is an officer or managing member of said entity. The City Manager may, in his sole discretion and for good cause shown, grant one extension of time to close title of up to, but not to exceed, sixty (60) additional days. No request shall be entertained unless in writing, stating the reasons therefor, and unless accompanied by a fee of \$250.00 per parcel for which a request is submitted. The fee shall be in addition to all other fees and deposits and shall not be credited against the purchase price and shall not be returnable. Any additional request made thereafter shall be made in writing and placed before the City Council for their consideration.
11. In the event that a sale is cancelled by court order, judgment, the Comptroller or the Newburgh City Council, the successful bidder shall be entitled only to a refund of the purchase money paid with interest. Purchaser agrees that he shall not be entitled to special or consequential damages, attorney's fees, reimbursement for any expenses incurred as a result of ownership, improvements of property, or for taxes paid during period of ownership, and this agreement by the purchaser is a material condition of the sale.
12. Sale shall be final, absolute and without recourse once title has closed and the deed has been recorded. In no event, shall City of Newburgh be or become liable for any defects in title for any cause whatsoever, and no claim, demand or suit of any nature shall exist in favor of the purchaser, his heirs, successors or assigns, against City of Newburgh arising from this sale.
13. Conveyance shall be by quitclaim deed only, containing a description of the property as it appeared on the tax roll for the year upon which the City acquired title or as corrected up to date of deed. The deed will be recorded by the City upon payment in full of the purchase price, buyer's premium, and closing fees/costs. Possession of property is forbidden until the deed is recorded conveying title to the purchaser. **Title vests upon recording of deed.**
14. Upon closing, the City shall deliver a quitclaim deed conveying all of its right, title and interest in the subject property, which deed shall be drawn by the City Corporation Counsel. The City shall not convey its interest in any street, water, sewer or drainage easement, or any other interest the City may have in the property. The City shall only convey that interest obtained by the City pursuant to the judgment rendered in an *in rem* tax foreclosure action filed in the Orange County Clerk's Office.
15. The description of the property shall be from the City of Newburgh Tax Map reference or a survey description certified to the City of Newburgh and provided to the City Corporation Counsel by the purchaser at least thirty (30) days in advance of closing title and approved by the City's Engineer.
16. Evictions, if necessary, are solely the responsibility of the successful bidder after closing and recording of the deed.
17. By acknowledging and executing these Terms & Conditions, the purchaser certifies that he/she is not representing the former owner(s) of the property against whom City of Newburgh foreclosed and has no intent to defraud City of Newburgh of the unpaid taxes, assessment, penalties and charges which

have been levied against the property. The purchaser agrees that neither he/she nor his/her assigns shall convey the property to the former owner(s) against whom City of Newburgh foreclosed within 24 months subsequent to the auction date. If such conveyance occurs, the purchaser understands that he/she may be found to have committed fraud, and/or intent to defraud, and will be liable for any deficiency between the purchase price at auction and such sums as may be owed to City of Newburgh as related to the foreclosure on the property and consents to immediate judgment by City of Newburgh for said amounts.

PART D - PROJECT DESCRIPTION & CONSISTENCY WITH GREENWAY GOALS

1. Project Description:

- (a) Please provide a brief, 50 word summary of the proposed project.

Newburgh Community Land Bank (NCLB) would transform three vacant lots into neighborhood green spaces. NCLB will work with Groundwork Newburgh's Green Team and One Nature, LLC, a local landscape architecture firm. The target lots are underutilized and are unsuitable for community garden use, but are strategically important for neighborhood revitalization.

- (b) With no more than 500 words, please describe: (1) The location, need for and purpose of the project, and the deliverable that will be produced with Greenway grant funds. (2) How the proposed project advances each of the five "Greenway Criteria" that apply. The Greenway Criteria are: Natural and Cultural Resource Protection; Regional Planning; Economic Development; Public Access; Heritage and Environmental Education. You may attach photographs, maps, renderings, etc. (3) If the project is an intermunicipal or collaborative effort, briefly describe the partnerships and how the project reinforces regional planning or cooperation.

1) NCLB is a quasi-public non-profit organization dedicated to returning vacant and abandoned properties to active use. Its first initiatives focus geographically on Newburgh's most challenging neighborhoods with high levels of vacancy, crime, and poverty. Most unimproved vacant lots become sites for refuse dumping and unsafe activity.

NCLB's work is concentrated on a five block area between Broadway and First Street and Dubois and Liberty Street. Within that area, Lander and Chambers Street are receiving particular attention with four active residential and mixed use projects underway with plans for another six buildings to go into construction in the next twelve months. The proposed project is within immediate proximity to this promising work.

The proposed project involves the improvement and maintenance of three vacant lots as inviting green spaces that also implement sound storm water management practices in a neighborhood with substantial water management problems. The work will employ youths via Groundwork Newburgh while also achieving the aforementioned physical needs of the neighborhood. Emphasis will be placed on native plant species with genomes traceable to this specific geography.

This project proposes to begin in late March 2014 with the design of the sites and plant and seed selection by One Nature LLC with feedback from the Groundwork Newburgh "Green Team"--a youth team employed to work on green initiatives in Newburgh. By mid-May, the installation of the project by the Green Team and other volunteers will be complete, though further improvements to the site, such as the addition of furniture may be ongoing. The Green Team will maintain the site over time, supported by NCLB, and One Nature LLC will provide as-needed technical support and trouble shooting. NCLB will ensure that the project succeeds through coordination, ownership and resource gathering.

2) This project will address Public Access to green space within the City, advance Economic Development that is balanced and mindful of building a high quality living environment for existing and future residents while employing local youths, and will incorporate Environmental Education for participating youth as well as area residents. Ongoing recreational and educational programming at the sites will buttress the education and employment goals of establishing and maintaining the sites. NCLB anticipates hosting approximately 4 events in Year 1 while also making the sites available for use by other parties.

3) There are four essential partners in this project: NCLB, who will own, insure and finance the sustainability of the sites; Groundwork Newburgh, who will manage the youth team who will build, maintain and help program the sites; and One Nature, LLC a design firm with specific expertise in community based, urban restorative ecology projects. Finally, the City of Newburgh, maintains its commitment to the goals of Greenway Communities and whose leaf mulch and woodchip supplies will be relied on to underpin all of the planting activities.

- (c) Is your project a plan or planning document? If "yes", include a proposed timetable for implementation (after completion of the document or plan), a description of the implementation steps, and whether funding sources for the implementation have been identified or secured. (100 words or fewer)

No. This project builds upon the Green Land Use Plan created utilizing Greenway Communities Grant funds in 2011-2012.

For Greenway Compact Grant Program Applications only:

If your municipality is a participating Greenway Compact community and applying under the Greenway Compact Grant Program, please answer the following:

Re: NYS DEC Notice of Violations dated February 23, 2015
Proposal for Engineering Services Relating to Chemical Bulk Storage

Dear Mr. Wade:

Per your request, I am pleased to provide this proposal for engineering services associated with the chemical bulk storage facility located at the City of Newburgh Water Plant. In particular, this proposal addresses the issues raised by Mr. Ed Moore of the NYS DEC during his February 18, 2015 site visit and the subsequent Notice of Violations ("NOV") dated February 23, 2015.

Background

In 1986, New York State passed two laws, Article 37 and Article 40 that were designed to protect public health, safety and the environment. Based on these laws, the NYS DEC promulgated regulations for the safe sale, storage and handling of hazardous substances. More specifically, these included regulations for the proper registration and inspection of chemical and petroleum bulk storage facilities with deadlines for upgrading and or replacing storage tanks. The deadlines have long since lapsed.

The chemical bulk storage facility at the City of Newburgh Water Plant has six chemical tanks: one 7,889 gallon tank for Hydrofluorosilicic Acid, one 350 gallon tank for Potassium Permanganate, two 3,000 gallon and two 350 gallon tanks for Sodium Hypochlorite. These tanks are all impacted by these regulations. The City began to address some of the State's requirements in 2013 when CJS began annual inspections and initiated a five year inspection of the storage facility.

On February 18, 2015 the NYS DEC inspected the site and formally notified the City of issues with the storage facility. These issues include the use of noncompliant and nonregistered tanks,

May 20, 2015
Mr. Chad Wade
City of Newburgh

the lack of a proper transfer station and improper labeling of storage tanks. The City is required to submit a plan to address each of these issues.

Qualifications

CJS is a New York State environmental engineering firm with extensive chemical bulk storage tank inspection and regulatory experience. Our work includes chemical and petroleum tank inspections, water and wastewater treatment consulting, permitting as well as numerous other environmental services. CJS has provided engineering services to clients throughout New York State and enjoys an excellent relationship with the various regional NYSDEC offices. We have recently provided inspection and design services at water treatment facilities in Brewster, Saugerties, Poughkeepsie, Newburgh (wastewater treatment plant), East Hampton, Southampton, Wallkill and several locations in Carmel, NY.

Scope of Services

In general, the proposed scope of work is to address the issues raised by the NYSDEC NOV and ensure compliance with NYSDEC Bulk Storage regulations. The two most serious violations concern the storage of hydrofluoric acid and the construction of a transfer station for the acceptance of chemical deliveries at the facility. There are also some reporting and labeling issues that need to be addressed.

The following is a proposed scope to address these issues:

1. **Hydrofluoric Acid Storage:** Since the NYS DEC inspection in February, the existing acid storage tank has been taken out of service. Totes are currently being utilized but, based on the amount of acid used on a daily basis, a bulk storage tank would be the preferred method of storage. Until the size and location of this new tank can be determined, it is difficult to quantify the level of engineering effort needed. As a first step, we propose to meet with the plant staff to size the new tank and to look into various locations to place the tank, including the use of the existing tank as a containment vessel.

This task includes one (1) site visit to review potential locations and determine tank size and the preparation of a report describing the location(s) selected, justification of the required tank size and any issues associated with the location(s). Based on this, we can provide a better estimate of the engineering work required, which may include a structural analysis of the existing tank or floor.

May 20, 2015
Mr. Chad Wade
City of Newburgh

2. **Transfer Station Design**: The existing fill ports for the sodium hypochlorite and hydrofluoric acid tanks are in an area that can be adapted into an acceptable transfer station. The piping and existing underground spill tank, which is used to collect rainwater at the loading dock and any leaks at the fill ports, will need to be modified as a holding tank for the transfer station.
This task will include reviewing the existing facility drawings, preparing the necessary design drawings, and meeting with plant staff to review the design. The drawings will have sufficient detail for the plant staff to perform these modifications. This task will also include providing the NYSDEC with copies of the drawings for their review.
3. **Spill Prevention Report (SPR) Revisions**: The existing SPR will be updated to reflect the changes made at the facility (i.e. change in tankage, transfer station sizing and design, etc.). This task will included any and all changes required to satisfy the NYSDEC.
4. **Labeling and Reporting Procedures**: CJS will review the existing tank and piping labels for compliance with the regulations and prepare a response to the NYS DEC.
5. **Tank Closure**: The hydrofluoric acid tank, which is currently out of service, must be closed in compliance with the regulations. CJS will ensure that the tank has been properly closed and the NYS DEC notified.
6. **NYS DEC Notification**: At the completion of the work, including the modifications to the loading dock area, a summary report will be prepared for submission to the NYS DEC in response to the NOV. This will include photographic evidence of the work and an updated SPR.

Fee Proposal

CJS proposes to perform the above services, per the following:

1. Hydrofluoric Acid Storage	\$2,525.00
2. Transfer Station Design	\$14,850.00
3. Spill Prevention Report Revisions	\$600.00
4. Labeling & Reporting Procedures	\$1,200.00
5. Tank Closure	\$750.00
6. NYS DEC Notification	<u>\$3,600.00</u>
Total Fee	\$23,525.00

It is estimated that work can begin within 2 to 3 weeks of receiving a purchase order.

Thank you for the opportunity to provide this proposal and we welcome the opportunity to discuss it with you in more detail.

RE: Amendment to Professional Services Agreement
West Trunkline Sewer Corridor Improvements Project
City of Newburgh, Orange County, New York

File: P702.2630

Dear Mr. Morris:

As you are aware, Barton & Loguidice, D.P.C. (B&L) has completed the scope of services in accordance with our Agreement for the Closed Circuit Television (CCTV) Inspections and the Cleaning of the West Trunkline Sewer, Combined Sewer Overflow Pipe, and portions of the Southern Interceptor Sewer up to the Northern Interceptor. We are currently working on the design of the sewer rehabilitation. B&L is pleased to continue assisting the City of Newburgh with effective and efficient implementation of the West Trunkline Sewer Corridor Improvements Project including the rehabilitation of the West Trunkline Sewer, and the stabilization of the Quassaick Creek Corridor. At this time, Barton & Loguidice, D.P.C. (B&L) is requesting an amendment to our agreement be authorized by the City to cover the additional costs associated with the following items:

1. Sewer Inspections & Cleaning;
2. Disposal of Heavy Cleaning Debris;
3. Additional Bypass Pumping;
4. Subsurface Investigations;
5. Services required to locate 54-inch West Trunkline Sewer;
6. Additional Survey along Walsh Road and along the CSX right of way to the Water Pollution Control Plant (WPCP);
7. Steel Pipe Condition Assessment;
8. Credit to the Contract for Archeological Investigations;
9. Reallocation of Budget From Final Design
10. Reallocation of Budget To Preliminary Design

Detailed descriptions of these changes in project scope follow:

1. Sewer Inspections & Cleaning

During an August 27, 2013 Project Status meeting, the City & Barton & Loguidice, D.P.C. (B&L) discussed the proposals received from Contractors as a result of the solicitation for the CCTV & Sewer Cleaning work. B&L assisted the City Engineer in drafting a memo to the City Manager copying the City Council and Corporation Council identifying that at the time, costs were projected to be in excess of the CCTV and Sewer Cleaning allowances included in our agreement. Please find a copy of the August 28, 2013 memo from the City Engineer which includes a summary of solicitations from Contractors for the work included in Attachment #1.

B&L included an allowance of \$60,000 to cover the costs associated with sewer inspections and cleaning. This was based on prior experiences for which the cost for CCTV Services (including cleaning) cost approximately \$2-3/ linear foot of sewer being cleaned and inspected. As a result of the quotes received from contractors, and utilizing the lowest overall cost, the actual cost incurred for CCTV & Cleaning was \$8-9/ linear foot due to the limited access along the sewer line. The actual costs incurred for CCTV & Cleaning are less than the \$279,000 budgeted for this work in the overall project resulting in an overall savings to the Project of \$171,000. The total cost for these subcontracted services were \$108,000 or an additional fee of \$48,000.

2. Disposal of Heavy Cleaning Debris

On March 5, 2015, representatives from TAM Enterprises, Inc., the subcontractor performing the CCTV and cleaning work; B&L and you met to discuss the activities of work completed to date and the anticipated activities necessary to complete the work. During the discussion, it was identified that the quantity of debris (grit, rocks, gravel, pieces of brick, asphalt, cement etc) removed from the southern interceptor was greater than originally anticipated, and this resulted in a protracted work schedule. In addition, the cost of disposal of the material was greater than the amount included in the project estimate. Through discussions with the Contractor, it was agreed that the most cost-effective method of payment for disposal of the material would be by volume (i.e. per cubic yard) of material removed rather than by weight. Payment by cubic yards would significantly reduce the weight of the material disposed through removal of the weight associated with water. The contractor removed the debris, stockpiled it onsite, allowed it to drain and then disposed of the material at a facility authorized to accept it.

Within the contract between B&L and TAM Enterprises, the removal of 50 cubic yards of material was included as a result of heavy cleaning. There was no such allowance included in B&L's Agreement with the City, but it was anticipated that heavy debris would be required due to the nature of the work being contemplated. At the time of requesting proposals, the actual quantity which existed in the sewers was unknown. The material actually removed from the sewers amounted to 134 cubic yards; this is 84 cubic yards greater than the 50 cubic yards included in the subcontract agreement.

The costs for heavy cleaning are \$300 per cubic yard. We believe this to be a fair price based upon the other costs quoted to us for that work. We are requesting that an additional \$40,200 be authorized to cover these additional costs incurred cleaning the sewers.

3. Additional Bypass Pumping

B&L included an allowance of \$40,000 to cover the costs associated with bypass pumping during the Sewer Cleaning and Inspections. As a result of the quotes received from contractors, the actual costs incurred in completing this work were anticipated to cost \$42,900. Due to the additional debris removal, the contractor needed to bypass pump for two additional weeks at \$7,200 per week. This results in an additional cost of \$17,300.

The CCTV work has taken significantly longer than anticipated in our agreement. B&L has been able to control costs to the best extent possible by not being onsite while all of the cleaning and CCTV was being completed however at this time B&L is seeking an adjustment to cover the costs incurred by the Subcontractor and anticipated to be incurred by a subcontractor in excess of the Allowances included in our Agreement with the City.

4. Subsurface Investigations

B&L solicited quotes from subcontractors in order to conduct subsurface investigations along the proposed creek realignment. The subcontractors identified that additional costs would be incurred due to the difficulty in access down along the stream. Access to the area is restricted by steep slopes, the CSX right of way, various abandoned foundations and basements and Holden Pond. Through discussions with the subcontractors, they have identified that costs upwards of \$60,000 will be required to cover costs associated with mobilization and access alone.

B&L included an allowance of \$40,000 to cover the costs associated with subsurface investigations. As a result of the quotes received from contractors, the actual costs to complete the subsurface investigation work are currently projected to be \$120,000. As such, we are requesting that an additional \$80,000 be authorized to cover these additional costs.

5. Services required to locate 54-inch brick sewer

The precise locations of the 54-inch sewer main from the intersection of Walsh Road and Dickson Street to sewer manhole 5 as well as the five access manholes along the West Trunkline Sewer remain unknown. Existing records do not provide enough information to locate the main and a standard metal detect and tracing wire were incapable of detecting the manholes or main. To complete cured-in-place lining to rehabilitate the main, the contract will need access at several points along the 54" sewer main.

As part of the project, a CSX Map will need to be filed showing the precise location of this crossing, and a Right-Of-Entry Permit will need to be filed. In order to locate the sewer main and access manholes, it has been suggested by several underground utility location companies to use Ground Penetrating Radar (GPR) with the combination of other detection technologies. The sewer main can be detected at numerous locations from start to finish, and these location points can then be "connected" for a close approximation of the entire main. Footages to each access manhole, taken from reviewed CCTV footage, would then be used to determine their locations.

B&L solicited quotes from subcontractors for underground utility detection services. Due to the difficult terrain, it is estimated that a crew of 2 people for approximately 3 days will be required to collect enough data to locate the sewer. B&L is requesting that \$ 30,000 be authorized to accommodate the location of the West Trunkline Sewer, this includes the filing of the Applications and Mapping to CSX on behalf of the City.

6. Additional Survey along Walsh Road and along the CSX right of way to the WPCP

During the design it was determined necessary that after the sewer is located that additional survey will be necessary to locate the sewer as well as prepare maps for submission to CSX for the right-of-entry permit. B&L is requesting that \$32,000 be authorized to extend the survey up Walsh Street to Dickson into the Hudson Health property and extend the survey down Water Street across the CSX line and along the CSX line to Renwick Street into the Water Pollution Control Plant. This includes fees for the surveyor and the fees payable to CSX for access and entry to their property.

7. Steel Pipe Condition Assessment

During the CCTV work, it was determined that without extensive bypass pumping, CCTV inspection of the lower section of the steel sewer could not be completed. As an alternative, to assess the condition of the existing steel sewer main as necessary for the rehabilitation work, it is proposed to physically inspect the exterior of the steel sewer including measurements of the thickness of the existing steel pipe walls.

from which we can provide an opinion of the pipe's integrity and continued reliability in conveying the flows to the Water Pollution Control Plant.

It is estimated that it would take 3 days for a 2 person crew to complete the inspection and measure the thickness of the steel pipe at critical locations. B&L is requesting that \$ 5,000 be authorized to accommodate this work.

8. Credit to the Contract

Within our initial agreement, we anticipated having to complete archeological services. Through coordination with NYSOPRHP, it has been determined that no further archeological investigations are necessary. As such, we propose to credit the City for these services which are not required. This results in a Credit of \$20,000 back to the City.

9. Budget Reallocation from Final Design Sewer Phase; AND

10. Budget Reallocation to Preliminary Design Sewer Phase

B&L billed for costs in excess of the budget that NYSEFC had in their system for the preliminary design phase of the project. In order to cover these costs, B&L is requesting that \$25,100 be reallocated from Final Design to Preliminary Design to cover the additional costs incurred during preliminary design. This change results in an increase in costs to the Preliminary Design phase of the project and a commensurate decrease in cost to the Final Design phase of the project, with no net change in project costs.

Summary:

The CCTV work has taken significantly longer than anticipated in our agreement. B&L has been able to control costs to the best extent possible by not being onsite while all of the cleaning and CCTV was being completed, however at this time B&L is seeking an adjustment to cover the costs incurred by the Subcontractor, anticipated to be incurred by a subcontractor, and additional services in excess of the Allowances and scope included in our Agreement with the City.

Re: West Trunkline Sewer Corridor Improvements Project

A project status meeting was held with Barton & Loguidice (B&L), on August 27, 2013 to review the status and projected schedule of their professional services related to referenced project.

B&L is proceeding with the Preliminary Design services as outlined in their professional services agreement. As part of their evaluation of the existing sewer, proposals for Pipe Location, CCTV and inspection were solicited from qualified contractors. The costs received from the contractors totals \$140,470 which is greater than the \$110,000 estimate which was included in B&L's proposal allowances for the CCTV, sewer cleaning, and uncovering of manholes. Please find attached, a summary of the quotes received for the work. B&L attributes this price increase to the numerous unknowns regarding access, and working adjacent to both a stream and steep slopes, thereby requiring specialized services from Contractors. While this cost increase is slightly offset by lower Archeological Investigation estimates, we are currently reviewing the necessary scope of the CCTV work in an attempt to find additional cost savings in other tasks as the preliminary design work continues. B&L is not asking for an increase at this time, as cost savings may be identified which would reduce the overall project costs to the City. We believe it prudent to bring this issue to the attention of the Council as the estimates exceed the initial values outlined in B&L's professional services agreement. We will work with B&L to identify any potential cost savings. Should the work exceed the amount in their agreement, B&L would request a supplemental authorization to cover these costs.

Also attached is the projected project schedule which outlines anticipated milestones and required actions necessary by City Council.

If you would like to discuss this at the Council Work Session, we can be available at either September meeting.

Scope of Services
Additional Services

**Additional Services
West Trunkline Sewer Corridor Improvements Project
City of Newburgh, Orange County, New York**

Barton & Loguidice, D.P.C. (B&L) is requesting an amendment to our agreement be authorized by the City to cover the additional costs associated with the following items:

1. Sewer Inspections & Cleaning;
2. Disposal of Heavy Cleaning Debris;
3. Additional Bypass Pumping;
4. Subsurface Investigations;
5. Services required to locate 54-inch West Trunkline Sewer;
6. Additional Survey along Walsh Road and along the CSX right of way to the Water Pollution Control Plant (WPCP);
7. Steel Pipe Condition Assessment;
8. Credit to the Contract for Archeological Investigations;
9. Reallocation of Budget From Final Design
10. Reallocation of Budget To Preliminary Design

Detailed descriptions of these changes in project scope follow:

1. Sewer Inspections & Cleaning

During an August 27, 2013 Project Status meeting, the City & Barton & Loguidice, D.P.C. (B&L) discussed the proposals received from Contractors as a result of the solicitation for the CCTV & Sewer Cleaning work. B&L assisted the City Engineer in drafting a memo to the City Manager copying the City Council and Corporation Council identifying that at the time, costs were projected to be in excess of the CCTV and Sewer Cleaning allowances included in our agreement. B&L included an allowance of \$60,000 to cover the costs associated with sewer inspections and cleaning. This was based on prior experiences for which the cost for CCTV Services (including cleaning) cost approximately \$2-3/ linear foot of sewer being cleaned and inspected. As a result of the quotes received from contractors, and utilizing the lowest overall cost, the actual cost incurred for CCTV & Cleaning was \$8-9/ linear foot due to the limited access along the sewer line. The actual costs incurred for CCTV & Cleaning are less than the \$279,000 budgeted for this work in the overall project resulting in an overall savings to the Project.

2. Disposal of Heavy Cleaning Debris

On March 5 2015, representatives from TAM Enterprises, Inc., the subcontractor performing the CCTV and cleaning work; B&L and you met to discuss the activities of work completed to date and the anticipated activities necessary to complete the work. During the discussion, it was identified that the quantity of debris (grit, rocks, gravel, pieces of brick, asphalt, cement etc) removed from the southern interceptor was greater than originally anticipated, and this resulted in a protracted work schedule. In addition, the cost of disposal of the material was greater than the amount included in the project estimate. Through discussions with the Contractor, it was agreed that the most cost-effective method of payment for disposal of the material would be by volume (i.e. per cubic yard) of material removed rather than by weight. Payment by cubic yards would significantly reduce the weight of the material disposed through removal of the weight associated with water. The contractor removed the debris, stockpiled it onsite, allowed it to drain and then disposed of the material at a facility authorized to accept it.

Within the contract between B&L and TAM Enterprises, the removal of 50 cubic yards of material was included as a result of heavy cleaning, There was no such allowance included in B&L's Agreement with the City, but it was anticipated that heavy debris would be required due to the nature of the work being

contemplated. At the time of requesting proposals, the actual quantity which existed in the sewers was unknown. The material actually removed from the sewers amounted to 134 cubic yards.

3. Additional Bypass Pumping

B&L included an allowance of \$40,000 to cover the costs associated with bypass pumping during the Sewer Cleaning and Inspections. As a result of the quotes received from contractors, the actual costs incurred in completing this work were anticipated to cost \$42,900. The CCTV work has taken significantly longer than anticipated in our agreement. B&L has been able to control costs to the best extent possible by not being onsite while all of the cleaning and CCTV was being completed however at this time B&L is seeking an adjustment to cover the costs incurred by the Subcontractor and anticipated to be incurred by a subcontractor in excess of the Allowances included in our Agreement with the City.

4. Subsurface Investigations

B&L solicited quotes from subcontractors in order to conduct subsurface investigations along the proposed creek realignment. The subcontractors identified that additional costs would be incurred due to the difficulty in access down along the stream. Access to the area is restricted by steep slopes, the CSX right of way, various abandoned foundations and basements and Holden Pond. Through discussions with the subcontractors, they have identified that costs upwards of \$60,000 will be required to cover costs associated with mobilization and access alone. As a result of the quotes received from contractors, the actual costs to complete the subsurface investigation work are currently projected to be in excess of the allowance included in the contract.

5. Services required to locate 54-inch brick sewer

The precise locations of the 54-inch sewer main from the intersection of Walsh Road and Dickson Street to sewer manhole 5 as well as the five access manholes along the West Trunkline Sewer remain unknown. Existing records do not provide enough information to locate the main and a standard metal detect and tracing wire were incapable of detecting the manholes or main. To complete cured-in-place lining to rehabilitate the main, the contract will need access at several points along the 54" sewer main.

As part of the project, a CSX Map will need to be filed showing the precise location of this crossing, and a Right-Of-Entry Permit will need to be filed. In order to locate the sewer main and access manholes, it has been suggested by several underground utility location companies to use Ground Penetrating Radar (GPR) with the combination of other detection technologies. The sewer main can be detected at numerous locations from start to finish, and these location points can then be "connected" for a close approximation of the entire main. Footages to each access manhole, taken from reviewed CCTV footage, would then be used to determine their locations.

B&L solicited quotes from subcontractors for underground utility detection services. Due to the difficult terrain, it is estimated that a crew of 2 people for approximately 3 days will be required to collect enough data to locate the sewer. Including the filing of the Applications and Mapping to CSX on behalf of the City.

6. Additional Survey along Walsh Road and along the CSX right of way to the WPCP

During the design it was determined necessary that after the sewer is located that additional survey will be necessary to locate the sewer as well as prepare maps for submission to CSX for the right-of-entry permit. B&L is requesting that \$32,000 be authorized to extend the survey up Walsh Street to Dickson into the Hudson Health property and extend the survey down Water Street across the CSX line and along the CSX line to Renwick Street into the Water Pollution Control Plant. This includes fees for the surveyor and the fees payable to CSX for access and entry to their property.

7. Steel Pipe Condition Assessment

During the CCTV work, it was determined that without extensive bypass pumping, CCTV inspection of the lower section of the steel sewer could not be completed due to excessive flows. As an alternative, to assess the condition of the existing steel sewer main as necessary for the rehabilitation work, it is proposed to physically inspect the exterior of the steel sewer including measurements of the thickness of the existing steel pipe walls, from which we can provide an opinion of the pipe's integrity and continued reliability in conveying the flows to the Water Pollution Control Plant.

It is estimated that it would take 3 days for a 2 person crew to complete the inspection and measure the thickness of the steel pipe at critical locations. B&L is requesting that \$ 5,000 be authorized to accommodate this work.

8. Credit to the Contract

Within our initial agreement, we anticipated having to complete archeological services. Through coordination with NYSOPRHP, it has been determined that no further archeological investigations are necessary. As such, we propose to credit the City for these services which are not required. This results in a Credit of \$20,000 back to the City.

9. Budget Reallocation from Final Design Sewer Phase; AND

10. Budget Reallocation to Preliminary Design Sewer Phase

B&L billed for costs in excess of the budget that NYSEFC had in their system for the preliminary design phase of the project. In order to cover these costs, B&L is requesting that \$25,100 be reallocated from Final Design to Preliminary Design to cover the additional costs incurred during preliminary design. This change results in an increase in costs to the Preliminary Design phase of the project and a commensurate decrease in cost to the Final Design phase of the project, with no net change in project costs.

In the event that any such CITY property is lost or damaged, except for normal wear and tear, then the CITY shall have the right to withhold further payments hereunder for the purposes of set-off in sufficient sums to cover such loss or damage.

ARTICLE 16. TERMINATION

The CITY may, by written notice to VENDOR effective upon mailing, terminate

this Agreement in whole or in part at any time (i) for CITY'S convenience, (ii) upon the failure of VENDOR to comply with any of the terms or conditions of this agreement, or (iii) upon the VENDOR becoming insolvent or bankrupt.

Upon termination of this Agreement, the VENDOR shall comply with any and all CITY closeout procedures, including, but not limited to accounting for and refunding to the CITY within thirty (30) days, any unexpended funds which have been paid to VENDOR pursuant to this Agreement; and

In the event the CITY terminates this Agreement in whole or in part, as provided in this Article, the CITY may procure, upon such terms and in such manner as deemed appropriate, SERVICES similar to those so terminated, and the VENDOR shall continue the performance of this Agreement to the extent not terminated hereby. RESOLUTION NO. 149 - 2015

OF

JUNE 15, 2015

**A RESOLUTION OF SUPPORT FOR THE NEW YORK STATE WAGE BOARD
RAISING THE WAGE OF FAST FOOD WORKERS AND
RECOMMENDING A WAGE OF \$15.00 AN HOUR IN NEW YORK**

WHEREAS, Governor Andrew Cuomo has empaneled a Wage Board to investigate and make recommendations on the minimum wage for fast food workers, which can adopt a \$15.00 per hour minimum wage to lift thousands of residents of Orange County working in the fast food industry out of poverty; and

WHEREAS, fast food workers are among the lowest paid workers in New York and throughout the nation, and full-time employment in the fast food industry still leaves a family under the federal poverty line. On average, those working in the fast food industry earn \$16,920.00 per year or \$8.75 per hour, given an increasingly rare 40-hour workweek; and

WHEREAS, inflation has increased each year and inequality has been increasing over the past four decades. The Federal minimum wage of \$7.25 per hour has not increased since July 24, 2009, and after decades of stagnating wages in 2013, the Governor signed legislation that raised the minimum wage from \$7.25 to its current level of \$8.75, with another incremental increase to \$9.00 that will take effect by the end of 2015; and

WHEREAS, there are approximately 180,000 fast food workers in New York State, and 3.6 million nationally, and fast food workers are disproportionately women, people of color and families. Over a quarter of all fast food workers are raising at least one child. 70 percent are over the age of 20. Two-thirds are the primary wage earners in their family; and

WHEREAS, raising wages for fast food workers comes at no cost to taxpayers, but fast food workers are presently twice as likely to be receiving public assistance compared with all working families. In New York State, 60 percent of all fast food workers have at least one family member on public assistance. Low wages therefore costs taxpayers an estimated \$700 million annually in public assistance; and

WHEREAS, a higher minimum wage of \$15.00 is good for the economy. A \$15.00 minimum wage levels the playing field for businesses to pay higher wages, eliminating the race to the bottom created by major corporations that rely on low wages to maintain profits. Increasingly communities are using \$15.00 as the new baseline for service jobs; and

WHEREAS, even a significant increase in fast food worker's wages to \$15.00 will not significantly impact the cost of fast food or the commercial viability of the fast food industry, which brought in \$551 billion in global revenues in 2014. The average fast food CEO earned \$23.8 million in 2013, up 400% from 2000 in real terms; and

WHEREAS, a \$15.00 an hour minimum wage would create jobs and help stimulate the economy. Studies have shown that low-wage workers are more likely than any other income group to spend additional earnings, and an increase in consumer spending for local businesses will lead to improved economic growth generated by raising wages. The experience of states the 13 states that increased the minimum wage since 2014, including NY bears that out. All but one (NJ) has seen increased employment rates;

NOW, THEREFORE BE IT RESOLVED, that the City Council of the City of Newburgh supports the New York State Wage Board raising the wage of fast food workers state wide and recommends a wage of \$15.00 an hour; and

BE IT FURTHER RESOLVED, that the City Clerk of the City of Newburgh shall send certified copies of this Resolution to New York State Governor Andrew Cuomo, N.Y. Assembly Member Frank Skartados, N.Y. Senator William Larkin, the New York State Wage Board, and to all New York State County Legislatures for their memorialization, and so moves for its adoption.

RESOLUTION NO.: 150-2015

OF

JUNE 15, 2015

**A RESOLUTION AUTHORIZING THE ADDITION OF
ONE (1) ANIMAL CONTROL OFFICER POSITION ON A TEMPORARY BASIS IN
THE CITY OF NEWBURGH POLICE DEPARTMENT**

WHEREAS, due to injury leave, it is necessary to create one additional position of Animal Control Officer so that there is sufficient personnel capable of performing such duties in the Police Department; and

WHEREAS, the Police Department has advised the City Manager that the department is in need of one (1) additional individual to perform the duties of “Animal Control Officer;” and

WHEREAS, the creation of the additional Animal Control Officer position will be on a temporary basis for the duration of the injury leave;

NOW, THEREFORE, BE IT RESOLVED, by the Council of the City of Newburgh, New York that the Personnel Analysis Book for the fiscal year 2015 be amended, and that there be and hereby is created one (1) additional position on a temporary basis for the duration of the injury leave in the job title “Animal Control Officer” in the Police Department.
