**Proposal for Engineering Services
CSO LTCP Phase I
Regulator No. 2 Improvements**

Water

Dear Mr. Morris:

Date:
March 23, 2016

Arcadis is pleased to provide you with this letter proposal for engineering services for the Regulator No. 2 Improvements Projects, as required by the Order on Consent for the combined sewer overflow (CSO) Long Term Control Plan (LTCP).

Contact:
Robert Ostapczuk

As part of the LTCP Arcadis developed a hydraulic model which was utilized to identify a hydraulic bottleneck in Regulator No. 2 that was a factor in the failure of the West Trunk Sewer. The bottleneck results in flows not being able to enter the CSO outfall sewer and a resulting hydraulic grade line formed upstream. We will utilize the model develop to assess alternatives to correct this hydraulic issues for the City and provide more flow control. We have proposed the following scope of work:

SCOPE OF WORK

Task 1 Kick Off Meeting and Site Visit

Arcadis will conduct a kickoff meeting to discuss the project scope of work, schedule, and deliverables. Arcadis will prepare an agenda and develop meeting minutes. Arcadis will conduct a site visit to visually observe the structure and field check existing drawings

Task 2 Site Survey

Arcadis will subcontract with a local surveyor to complete a site survey that includes topographical features, surface improvements, utilities marked out by the City of Newburgh, property boundaries and/or ROWs, rims and inverts of sewer manholes, overhead utilities and stream boundaries. Based on the alternatives evaluated in Task 3, Arcadis will subcontract with a geotechnical driller to either perform two soil borings to 40 depth or refusal and/or to perform 12 foot deep geoprobes. Final geotechnical evaluations will be dependent on the feasibility of alternatives. Arcadis will subcontract with a NYS certified Minority or Women Owned Business (M/WBE) to complete the site survey and geotechnical drilling.

Task 3 Planning and Preliminary Engineering

Arcadis will utilize the hydraulic model developed for the CSO LTCP to assess corrective measures to improve flows to the CSO overflow sewer. We will evaluate existing system performance of Regulator No. 2, surrounding interceptors, and overflow pipe for the typical five year period (2000 - 2004). Using this five year simulation, determine the cause (regulator weir undersized suspected) and extents of surcharged interceptors impacted by backwater conditions. In consultation with the City, Arcadis will develop up to three improvement alternatives to eliminate hydraulic bottleneck at Regulator No. 2. We will assess the addition of real-time controls by integrating WWTP influent flows into the control systems of a modulating sluice gate. Arcadis will perform constructability and operability reviews on each alternative and assess long term options for regulator maintenance and bypassing.

Each alternative's system performance and ability to eliminate surcharging in surrounding interceptors for the typical five year period (2000 - 2004) will be evaluated. Arcadis will develop budgetary cost estimates for each alternative. Budgetary estimates will be prepared in accordance with the American Association of Cost Estimators (AACE) Class 4 Estimate with an expected accuracy range of +50% to -30%. Arcadis will summarize hydraulic findings of alternative analysis and select a preferred alternative during a workshop. Modeling staff will be included via skype.

After an alternative is selected during consultations with the City, Arcadis will optimize the alternative configuration for typical year (2002) and assess the impacts during 100 and 500 year storm events. We will summarize the analysis and conclusions in a 1-2 page technical memorandum with supporting graphics.

Task 4 Basis of Design Report

Based on the selected alternative outlined under Task 3, Arcadis will develop a Basis of Design Report to concisely summarize the improvements recommended at Regulator No. 2. The basis of design report will be prepared in accordance with NYS EFC guidance if the City elects to pursue CW SRF funding or financing and includes the preliminary engineering technical memorandum as a section on alternatives. Arcadis will outline permitting requirements including SEQR, including SHPO and endangered species, NYS DEC wastewater facilities approval, Joint ACE and NYS DEC stream disturbance (based on the proximity to the Quassaick Creek), and NYS EFC (if required). The Basis of

Design Report will include conceptual site layouts, arrangement drawings, hydraulic profiles, P&IDs, and equipment and material selections.

Task 5 Prepare Bid Documents

Arcadis will prepare Bid Documents for regulatory approval and bidding purposes for the Regulator No. 2 improvements. The Bid Documents will be comprised of both Drawings and a Project Manual. They will be developed as a single prime contract in accordance with Wick's Law. Arcadis will provide the City with review submittals at 60% and 90% design development phases for review and comment.

Due to the unknown nature of the extent of structural improvements required to be completed at Regulator No. 2, we have included an allowance for structural engineering to be included if required. The extent of structural engineering efforts will be determined upon the finalization of Task 3.

Arcadis will update the cost estimate at the 60% (AACE Class 4) and 90% (ACEE Class 3) submittals.

Task 6 Regulatory Approval and Permitting

Pirnie/ARCADIS will submit three sets of half sized Bid Documents and Basis of Design Report to the NYS DEC and/or NYS EFC on behalf of the City. We will submit the 90% Bid Documents and upon receipt of comments from both the City and regulatory agencies, Arcadis will finalize the Bid Documents and prepare comment response correspondence. Only one comment response letter has been included in the budget. Arcadis will solicit a determination letter from the SHPO on cultural resources and the USFWS for endangered species in support of the preparation of a Short Form EAF for City Council action. If required, Arcadis will prepare and submit a Joint Application for Stream Bank Disturbance.

Task 7 Bidding Assistance

Arcadis will assist the City with bidding the project. We will prepare Bid Documents on CD-ROM media for electronic bidding. We will prepare an advertisement of bids for the City to advertise for their legal notification. We will submit the Bid Documents up to three construction plan rooms for advertisement. We will conduct a pre-bid meeting with prospective bidders. Arcadis will accept prospective bidders' requests for clarifications and prepare and distribute addenda as required. Arcadis will attend the bid opening, tabulate bids and make a recommendation of award.

Task 8 Construction Administration

Arcadis will consult with and advise City and act as City's representative throughout the construction of the Regulator No. 2 Improvements. All of City's instructions to Contractor will be issued through Arcadis who will have authority to act on behalf of City.

We will prepare agreements for the Contract for the City's execution with the Contractor. Arcadis will issue Notices to Proceed to the Contractor in accordance with the Contract Documents. We will schedule and conduct a pre-construction conference with the Contractor, representatives of the City, and any

regulatory and/or funding agency representatives as required. We will prepare and distribute meeting minutes.

Arcadis will issue necessary interpretations and clarifications of the Contract Documents and in connection therewith prepare Change Orders for execution by City, if appropriate.

Arcadis will review and approve (or take other appropriate action) Shop Drawings, samples, and other data which the Contractor is required to submit. Such reviews shall be for conformance with the design concept of the Project as a functioning whole and compliance with the information given in the Contract Documents. Any approvals or other actions associated with the reviews shall not extend to means, methods, techniques, sequences or procedures of construction or to safety precautions and programs incident thereto. Arcadis limits reviews of shop drawings to two reviews for all shop drawings in total. We will evaluate and determine the acceptability of substitute or 'equivalent' materials and equipment proposed by Contractor.

Based on on-site observations and on review of applications for payment and the accompanying data and schedules, Arcadis will:

- Recommend in writing payments to Contractor. Such recommendations of payment will constitute a representation to City that the Work has progressed to the point indicated and that, to the best of our knowledge, information and belief, the quality of the Work is generally in accordance with the Contract Documents subject to an evaluation of the Work as a functioning whole prior to or upon Substantial Completion, to the results of any subsequent tests called for in the Contract Documents and to any other qualifications stated in the recommendations.
- In the case of unit price Work, include final determinations of quantities and classifications of the Work in the recommendations of payment, subject to any subsequent adjustments allowed by the Contract Documents.

Arcadis shall not be responsible for the acts or omissions of the Contractor, or of any subcontractor or supplier, or any of the Contractor's or subcontractor's or supplier's agents or employees or any other persons (except Arcadis' own employees and agents) at the site or otherwise furnishing or performing any of the Work. However, nothing contained herein shall be construed to release Arcadis from liability for failure to properly perform the duties and responsibilities assumed by Arcadis in the Contract Documents.

Task 9 Progress Meetings and Periodic Site Visits

Arcadis will schedule and attend biweekly progress meetings at the site to facilitate coordination between Contractors, update construction schedules, discuss progress of the work, requests for information, and any proposed field or change orders. We will make visits to the site at intervals appropriate to the various stages of construction, as Arcadis deems necessary to observe, as an experienced and qualified design professional, the progress and quality of the Contractors' work.

Use or disclosure of information contained on this sheet is subject to the restriction and disclaimer located on the signature page of this document.

Mr. Jason Morris
March 23, 2016

We will conduct an inspection to determine if the work is substantially complete, for each milestone, and a final inspection to determine if the completed Work is acceptable so that Arcadis may recommend, in writing, final payment to Contractor. We will prepare and distribute a punch list prior to the final inspection.

Task 10 Construction Inspection

Arcadis will perform part time inspection services on behalf of the City. The construction inspector will be our agent or employee and under our supervision. The purpose of representation by the Construction Inspector at the site will be to provide for City a greater degree of confidence that the completed Work will conform generally to the Contract Documents and that the integrity of the design concept as reflected in the Contract Documents has been implemented and preserved by Contractor.

Arcadis shall not, during such visits or as a result of observations or inspections of the Work in progress, supervise, direct or have control over the Work nor shall Arcadis have authority over or responsibility for the means, methods, techniques, sequences or procedures of construction selected by Contractor, for safety precautions and programs incident to the work of Contractor or for any failure of Contractor to comply with laws, rules, regulations, ordinances, codes or orders applicable to Contractor furnishing and performing the Work. Arcadis can neither guarantee the performance of the Work by the Contractor nor assume responsibility for Contractor's failure to furnish and perform the Work in accordance with the Contract Documents.

During its visits, we may disapprove of or reject the Work while it is in progress if Arcadis believes that the Work will not produce a completed Project that conforms generally to the Contract Documents or that it will prejudice the integrity of the design concept of the Project as reflected in the Contract Documents.

We will have a Construction Inspector on site a minimum of one day a week depending on construction activities. The level of part time inspection will depend on the Contractor and the methods they employ. Arcadis will subcontract with an M/WBE subcontractor to complete the inspections if requested by the City.

Task 11 Contractor's Completion Documents

Arcadis will receive and review maintenance and operating instructions, schedules, guarantees, bonds and certificates of inspection, tests, approvals, and record documents, which are to be assembled by Contractor in accordance with the Contract Documents. Such review is limited to determining that their content complies with the requirements of the Contract Documents. We will transmit the documents to City with written comments and certification of the work in the general accordance of the Contract Documents

The Newburgh Friends of the Library is interested in establishing a Little Free Library site at Unico Park on the waterfront. These small lending libraries, numbering over 36,000 worldwide, are dedicated to promoting literacy and a love of reading. The concept is simple-“Take a book, leave a book.” Users are, we hope, encouraged to take a book, read it, and return it to choose another. Our group will be certain to choose appropriate titles and subjects.

The Friends of the Library is willing to pay for the cost of construction and installation and will visit the site periodically (perhaps weekly) to monitor and restock books. The City of Newburgh will not incur any costs, either in financial terms or in manpower.

The basic structure will sit on a post which will be set inside a concrete footing. Its rough dimensions will be approximately 20 inches wide, 12 inches deep, and 20 inches long. The post will be at a height which can be easily accessed by children. The structure itself will be weatherproof and can be landscaped with a small flowerbed around it. Some examples of existing ones can be seen at the littlefreelibrary.org. Website.

We would like, with your approval, to get this project started for the spring of this year. The return of warm weather brings thousands of people to the Newburgh waterfront and we hope that our project will attract and further enhance this scenic location. If this project should prove successful, we envision other spots throughout the city strengthening our sense of a shared community.

DOWNTOWN REVITALIZATION INITIATIVE

Description

The Downtown Revitalization Initiative (DRI) will invest \$10 million in each of 10 communities ripe for development to transform them into vibrant communities where tomorrow's workforce will want to live, work and raise families. The program emphasizes using investments to reinforce and secure additional public and private investments proximal to, and within, downtown neighborhoods, and in doing so will build upon growth spurred by the Governor's Regional Economic Development Councils (REDCs).

Cesar A. Perales has been designated Chairman to lead the initiative. Private sector experts and planners from the Department of State (DOS), with support from other state agencies, will assist selected municipalities in building strategic investment plans and identifying key projects consistent with the DRI's program goals.

Downtown Identification

Each REDC will nominate one downtown in their region best positioned to take advantage of the DRI. The REDCs will use a [template](#) to nominate downtowns by June 30, 2016. The REDC may utilize an existing subcommittee or form a specific subcommittee to advance this project. The REDC may gather public input on downtowns under consideration.

REDCs will weigh, at a minimum, the criteria below when nominating downtowns:

- 1) Downtowns should be compact, with well-defined boundaries. There is no minimum or maximum size for downtowns. Downtowns can range from a corridor or block(s) of a neighborhood to the municipality's traditional central business district. However, core neighborhoods beyond the central business district are also eligible. For example, an arts or entertainment district could be the focus of the DRI, however, it should be shown how these areas complement existing downtowns.
- 2) The municipality, or the downtown's catchment area, should be of a size sufficient to support a vibrant, year-round downtown. In analyzing this, REDCs should consider whether there is a sizeable existing or increasing population within easy reach for whom this would be the primary downtown destination.
- 3) Downtowns should be selected that are able to capitalize on prior, or catalyze future, private and public investment in the neighborhood and its surrounding areas. When evaluating a downtown for nomination, the REDCs should consider:
 - The presence of nearby investments planned or undertaken through the REDCs or with other public or private funding;
 - Continuity with the REDC's previously articulated vision for the area/region and consistency with recent planning efforts for the area;
 - The existence of developable properties within the downtown, including properties that can be utilized for affordable housing;

- The growth potential and community involvement of anchor institutions in or near the downtown;
 - The municipality's current investment commitment to the downtown, including through business improvement districts or partnerships with non-profits;
 - The ability of existing infrastructure to support development of the downtown, and the potential to maximize recent infrastructure upgrades;
 - Application of Smart Growth principles; and
 - Investments in arts and cultural institutions and activities.
- 4) A crucial part of the selection of a downtown is the recent or impending job growth within, or in close proximity to, the downtown. The attraction of professionals to an active life in the downtown will support redevelopment and make growth sustainable in the long-term. In evaluating job growth near the downtown, REDCs should consider:
- The presence of major job-creating projects and initiatives near the downtown;
 - The existence of new and expanding employers;
 - Whether new and existing jobs are accessible from the downtown by foot or via public transit; and
 - The diversity in area job opportunities, with different salaries/entry levels and potential for mobility between jobs.
- 5) The downtown must be an attractive and livable community for diverse populations of all ages, including millennials and skilled workers. In evaluating this, REDCs should consider whether the downtown contains, or could contain, the following physical properties and characteristics:
- Developable mixed-use spaces;
 - Housing at different levels of affordability and type;
 - Commercial and retail main street businesses, including healthy and affordable food markets;
 - Multi-modal transit;
 - Walkability and bikeability, within the downtown and connecting the downtown to surrounding open space networks and regional destinations;
 - Accessible recreation amenities, parks and gathering spaces;
 - Access to health care facilities;
 - Cultural and entertainment amenities; and
 - Broadband accessibility.
- 6) The downtown should already embrace or have the ability to create and implement policies that increase livability and quality of life, including through:
- Downtown plans;
 - Modern zoning and parking standards;
 - Management structure, such as a Downtown Manager or Downtown Business Improvement District;
 - Complete Streets plans and laws;
 - Transit-oriented development;
 - Land banks;
 - Energy-efficiency;
 - Smart Cities innovation; and
 - An inclusive environment for New Americans.

- 7) Downtowns must have sufficient local community and public official support in order to develop and implement their strategic investment plan. Local leaders and stakeholders who are committed to working together on a plan and the initial local lead should be identified.

Strategic Investment Plans

DOS will rapidly launch the DRI Fast Track Planning Initiative in July 2016 following certification of 10 downtowns. The communities will enjoy technical support from both state and private sector planning experts and a locally established committee. Private sector planning experts will be paid out of the \$10 million awards (up to \$300,000 per community), with the remainder of the award utilized to implement the plan. For downtowns that identify a need for healthy and affordable food markets, up to \$500,000 of implementation funding will be available statewide for projects that are consistent with the Healthy Food/Healthy Communities Initiative.

The strategic investment plans will examine local assets and opportunities to build a vision for revitalization unique to that downtown. The plans will include identification of economic development, transportation, housing, and community projects that align with that vision and can be leveraged for additional investment.

Work on the strategic investment plans will be overseen by a local DRI Planning Committee. This committee should include representatives from a number of the following interest groups and organizations:

- The REDC for the municipality's region;
- Local and regional government officials;
- Neighborhood associations, homeowners, and renters;
- Property owners, local developers, and realtors;
- Chambers of commerce, local business associations, and business owners;
- Community foundations and community loan funds;
- Local development corporations, housing corporations, Industrial Development Agencies, and business improvement districts;
- Cultural institutions, including museums, historic sites, theaters, etc.;
- Educational institutions, including administrative and student leadership of area universities and colleges;
- Local non-profit and advocacy organizations that address quality of life (i.e. bicycle coalitions, park conservancies, arts organizations, YMCA, etc.);
- Social and public service organizations (local police, health care providers, etc.); and
- Faith-based organizations.

While strategic investment plans will be individualized to ensure sustainable growth in each unique downtown, fundamental goals include:

- 1) Creation of an active, desirable downtown with a strong sense of place;
- 2) Attraction of new businesses (including "Main Street" businesses), high-paying jobs, and skilled workers;
- 3) Arts and cultural attractions;
- 4) A diverse population, with residents and workers supported by complementary housing and employment opportunities;
- 5) An enhanced local property tax base; and
- 6) Amenities to support and enhance downtown living and quality of life.

Strategic investment plans will also consider, as appropriate for each community, the municipality's ability to create or improve these elements of the selected downtown, through policies as well as specific projects:

- Proximity and accessibility to daily destinations - particularly jobs and different housing types;
- Density in the downtown - compact zoning and building;
- Diversity in land uses and a zoning code enabling a mix of uses;
- Transit-oriented development with access to reliable public transit (within ½ mile of the downtown);
- Walkability/bikeability;
- Sustainable, energy-efficient development that aligns with the goals of the State Energy Plan;
- Smart Cities innovations that lower local government costs while improving municipal service delivery;
- Presence of and collaboration with anchor institutions in or near the downtown;
- Existence of healthy and affordable food markets;
- Accessible parks, public gathering spaces, and entertainment amenities;
- Inclusiveness of New Americans; and
- Demonstrations of support from key stakeholders and local capacity for implementation.
